

Special Issue

Statistical Learning for High-Dimensional Data

Message from the Guest Editor

I am pleased to announce this new Special Issue on theoretical developments and applications related to statistical learning and high-dimensional data. In this Special Issue, we will consider topics such as machine and statistical learning methods, supervised and non-supervised, deep learning, and other multivariate methods, with application in multivariate independent and dependent data, in all application areas. More generally, this Special Issue aims to gather recent developments and applications of statistical learning methods for multivariate data. Manuscripts introducing new methodologies which can be helpful to practitioners are highly appreciated. I look forward to receiving your submissions.

Guest Editor

Prof. Dr. Paulo Canas Rodrigues

Department of Statistics, Federal University of Bahia, Salvador 40170-110, Brazil

Deadline for manuscript submissions

closed (30 September 2024)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Wei Zhu

Department of Applied Mathematics and Statistics, State University of
New York at Stony Brook, Stony Brook, NY 11794, USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, RePEc, and
other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.2 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
