

Special Issue

Machine Learning and Natural Language Processing (ML & NLP)

Message from the Guest Editor

The Special Issue is concerned with textmining and natural language processing, which comprises, among other things: - Ontology, embeddings (static), transformers (contextual embeddings), NER (named entities recognition), text classification, text generation (GAN), text summarization, word clustering, sentiment analysis, pattern recognition, tagging/annotations, document summarization, entity extraction, etc. The Special Issue is dedicated to the modelization (statistical models) applied to texts, such as supervised and non-supervised models, and algorithms that help to identify patterns in texts. A special focus could be placed on explainable artificial intelligence (XAI), i.e., neural networks applied to texts in order to determine words and sentences that contribute to the prediction/classification made by the neural network. Applications to all kinds of texts is welcome, and in this respect many fields may be covered: health, biomedical research, law, jurimetrics, economics, finance, etc.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Wei Zhu

Department of Applied Mathematics and Statistics, State University of
New York at Stony Brook, Stony Brook, NY 11794, USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, RePEc, and
other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.2 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
