

Special Issue

Multivariate Statistics and Applications

Message from the Guest Editor

I am pleased to announce a Special Issue on Multivariate Statistics and Applications. Being that nature is multivariate, it is not surprising that a phenomenon would usually depend on several factors, possibly correlated and whose representation must necessarily involve a useful methodology able to understand and process information in a meaningful fashion. The ambitious aim of this Special Issue is to present a wide range of the newest results on multivariate statistical models, distribution theory, and applications of multivariate statistical methods where applications range from finance and insurance mathematics to medical and industrial statistics and sampling algorithms. Multivariate statistical methods are also essential in communication research and in the developing process of models for online monitoring and control. Similarly, manuscripts putting forward specific multivariate statistics methodologies which can be useful to practitioners are highly appreciated. I look forward to receiving your submissions.

Guest Editor

Dr. Silvia Romagnoli

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Wei Zhu

Department of Applied Mathematics and Statistics, State University of
New York at Stony Brook, Stony Brook, NY 11794, USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, RePEc, and
other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.2 days after
submission; acceptance to publication is undertaken in 2.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
