

Special Issue

New Insights into Plastic Aesthetic and Regenerative Surgery

Message from the Guest Editors

We are pleased to announce the launch of a Special Issue of *Surgical Techniques Development*, a peer-reviewed open access journal, dedicated to innovative techniques and updates on the multidisciplinary fields of plastic reconstructive aesthetic and regenerative surgery. We aim to explore the different aspects of plastic surgery and the capability to solve challenging clinical cases, including complex reconstructions using flaps knowledge and innovative, regenerative, and minimally invasive procedures using fat cell and stem cells transfer. With a focus on novel techniques, this Special Issue will address advancements in the reconstructive and aesthetic aspects of plastic surgery, as well as other surgical fields. We invite you to join us in developing this upcoming issue, "New Insights into Plastic Aesthetic and Regenerative Surgery". We look forward to receiving a variety of manuscript proposals, which can be sent as an email attachment to the Editorial Office at std@mdpi.com.

Guest Editors

Dr. Egidio Riggio

About the Journal

Message from the Editor-in-Chief

The amazing world of the surgical sciences consistently grows thanks to innovations, technologic and robotic changes, and lastly to the progress in artificial intelligence. Nevertheless the human factor still remains fundamental in all the fields of Surgery. Individual skills in surgical techniques and multidisciplinary approaches are strengthening the patient care options and efficiency. Our journal wishes to become the spotlight for different surgical specialties such as general surgery and endoscopy, oncological surgery, plastic surgery, head and neck, gynecology, thoracic surgery, orthopedics, neurosurgery and other fields. Progress in recent years has led surgical technologies and procedures to extend to several specialties, thus the need for a journal to collect all related topics. Therefor, *Surgical Techniques Development* will encourage multidisciplinary contributions.

Editor-in-Chief

Dr. Egidio Riggio
