

Special Issue

Feature Papers in Spinal Surgery 2024

Message from the Guest Editors

In this Special Issue, we delve into the forefront of spinal surgery, showcasing a blend of groundbreaking research, innovative surgical techniques, and comprehensive reviews that set the stage for future advancements. Our objective is to illuminate the path of spinal surgery's evolution, spotlighting both the complexities of spinal disorders and the strides made in their management. This Issue reflects on the rich history of spinal surgery, tracing its development from traditional methods to the advent of minimally invasive techniques, and aims to capture current research and emerging trends.

We present a broad spectrum of contributions, ranging from original research articles that push the boundaries of knowledge to case studies that highlight unique challenges and solutions in spinal surgery. In addition, we welcome systematic reviews and meta-analyses that offer insights into the effectiveness of different surgical approaches. This issue aims to serve as a comprehensive guide for both seasoned practitioners and novices in the field, encouraging the exchange of knowledge, experience, and innovative ideas.

About the Journal

Message from the Editor-in-Chief

The amazing world of the surgical sciences consistently grows thanks to innovations, technologic and robotic changes, and lastly to the progress in artificial intelligence. Nevertheless the human factor still remains fundamental in all the fields of Surgery. Individual skills in surgical techniques and multidisciplinary approaches are strengthening the patient care options and efficiency. Our journal wishes to become the spotlight for different surgical specialties such as general surgery and endoscopy, oncological surgery, plastic surgery, head and neck, gynecology, thoracic surgery, orthopedics, neurosurgery and other fields. Progress in recent years has led surgical technologies and procedures to extend to several specialties, thus the need for a journal to collect all related topics. Therefor, *Surgical Techniques Development* will encourage multidisciplinary contributions.

Editor-in-Chief

Dr. Egidio Riggio
