

Special Issue

Review Collection on General and Oncological Surgery

Message from the Guest Editors

Surgical Techniques Development (ISSN 2038-9582) is an international, open access journal on the latest progressive techniques and advanced technologies used in surgery. Our journal focuses on the latest surgical technologies, such as laparoscopy, minimally invasive surgery, endoscopy, robotics, and other advanced surgical technologies. This Special Issue will focus on general and oncological surgery. The subjects involved include, but are not limited to:

- Trauma surgery;
- Laparoscopic surgery;
- Colorectal surgery;
- Breast surgery;
- Vascular surgery;
- Endocrine surgery;
- Transplant surgery;
- Surgical oncology;
- Cardiothoracic surgery;
- Pediatric surgery.

We look forward to receiving contributions to this Special Issue, which will exclusively host review papers providing valuable insights into all aspects of surgical techniques.

About the Journal

Message from the Editor-in-Chief

The amazing world of the surgical sciences consistently grows thanks to innovations, technologic and robotic changes, and lastly to the progress in artificial intelligence. Nevertheless the human factor still remains fundamental in all the fields of Surgery. Individual skills in surgical techniques and multidisciplinary approaches are strengthening the patient care options and efficiency. Our journal wishes to become the spotlight for different surgical specialties such as general surgery and endoscopy, oncological surgery, plastic surgery, head and neck, gynecology, thoracic surgery, orthopedics, neurosurgery and other fields. Progress in recent years has led surgical technologies and procedures to extend to several specialties, thus the need for a journal to collect all related topics. Therefor, *Surgical Techniques Development* will encourage multidisciplinary contributions.

Editor-in-Chief

Dr. Egidio Riggio
