

## Special Issue

# Environmental Pollution & Climate Change: Responses of Plant Organisms to Harsh Environments

### Message from the Guest Editors

Potential topics include, but are not limited to:

- Global change biology
- Air and soil pollution
- Tropospheric ozone
- Xenobiotics
- Heavy metals
- Biogenic volatile organic compounds (BVOCs)
- Secondary metabolism and metabolites
- Chemical ecology
- Ecotoxicology
- Loss of biodiversity

---

### Guest Editors

Prof. Dr. Marcello Iriti  
Dr. Georgios Liakopoulos  
Dr. Eleni Tani

## About the Journal

### Message from the Editor-in-Chief

*Stresses* is an open access international journal publishing top quality research covering all aspects of how humans, animals, plants, algae, fungi, bacteria, and viruses respond to abiotic and biotic stresses. The thinking behind *Stresses* is substantially inspired by the pioneering studies on the effects and responses to various stressors performed by the eminent scientist Hans Selye. Submissions from basic and applied research are welcome, as long as they are based on a clearly defined mechanistic hypothesis. Review manuscripts are encouraged, but they must be a critical review of existing literature and not just a summary. All submitted manuscripts will be subjected to a thorough peer-reviewing process.

---

### Editor-in-Chief

Dr. Monica Ruffini Castiglione

Department of Biology, University of Pisa, Via Luca Ghini 13, I-56126  
Pisa, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
