

Special Issue

Thin Films at Surfaces

Message from the Guest Editors

Many advanced applications in technology rely upon thin and ultrathin films carefully designed, engineered and deposited on the surfaces of solid substrates.

Optoelectronic and magnetic devices, nano-electronics and MEMS, biomedical, catalytic and photocatalytic surfaces, tribological, anticorrosion and other protective coatings—to cite just a few examples—are all based on surface films... The aim of this Special Issue of *Surfaces* is to offer a broad open-access forum for all groups across the surface science community and gather together a collection of original fundamental, applied research articles and review papers in the context of “Thin Films at Surfaces”. A special emphasis will be given to but not limited by the topics... Further reading at:

About the Journal

Message from the Editor-in-Chief

Surfaces and interfaces are ubiquitous, and their relevance in Chemistry, Physics, Catalysis, Materials Science & Engineering, Nanoscience, Biology and Nanomedicine is nowadays well acknowledged. Similarly, surfaces cannot be neglected when targeting applications in many strategic fields, such as sensors, energy conversion and storage, environmental and food science, and medical devices.

Surfaces is a new Open Access journal that will provide rapid publication of scholarly articles on studies related to surfaces and interfaces. Its mission is to publish cutting edge articles and conference proceedings and organizing special issues to highlight outstanding research on specific topics, encouraging the application of a rigorous Surface Science-based approach to many complex interesting phenomena and breaking boundaries among different disciplines.

Editor-in-Chief

Prof. Dr. Gaetano Granozzi
Department of Chemical Science, Università degli Studi di Padova,
Padua, Italy

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, Inspec, CAPIus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).

Journal Rank:

CiteScore - Q2 (Materials Science (miscellaneous))
