Feature Papers in Hand Surgery and Research

Message from the Guest Editor

This Special Issue, titled "*Feature Paper in Hand Surgery and Research*," aims to highlight high-quality contributions that reflect the most recent advancements and ongoing challenges in hand surgery. We welcome original research, comprehensive reviews, and case series that explore clinical outcomes, surgical innovations, biomaterials, regenerative strategies, nerve repair, and postoperative rehabilitation. Contributions focusing on experimental models, surgical anatomy, or interdisciplinary approaches involving bioengineering and tissue regeneration are particularly encouraged. The aim of this Special Issue is to foster collaboration and knowledge dissemination among surgeons, researchers, and allied professionals involved in hand surgery and related subspecialties. Through this Special Issue, we hope to stimulate further developments and generate discussion on current practices and future directions in hand surgery.

About the Journal

Message from the Editor-in-Chief

Surgery, as in the ‘stitching of wounds with bone needles’, is the oldest form of medicine after herbs, dating from 30,000 BC. While basic principles remain, technology has progressed enormously, especially in recent years. *Surgeries* provides a platform for all surgery-related developments, both clinical and scientific, while its open access format ensures global availability. A wide variety of subjects will be covered by our enthusiastic, international, and interdisciplinary Editorial Board and team. Besides ensuring rapid, high-quality review, editors will actively organize Special Issues on topics of high interest. Together with authors and reviewers, we aim to develop *Surgeries* into an indispensable, easily accessible source for surgery professionals and beyond.

Editor-in-Chief

Prof. Dr. Salomone Di Saverio

ASUR Marche, AV5, Hospital of San Benedetto del Tronto, 63074 San Benedetto del Tronto, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
