

Special Issue

Oral and Maxillofacial Surgery: Balance Between Innovative and Proven Procedures, Drugs and Materials, 2nd Edition

Message from the Guest Editor

The clash between experience and modernity is a particularly delicate issue in medicine. Additional factors in the degree of the difficulty of procedures, the availability of medical equipment, and the cost-effectiveness further complicate the choices that, in theory, should be dictated solely by medical considerations. I invite you to cocreate, with the aim of presenting the best proven practices, innovative clinical management, and prospects for the development of oral and maxillofacial surgery. Potential topics include, but are not limited to, the following: advances in craniofacial traumatology; predictable orthognathics in the context of digitization; innovations in the treatment of temporomandibular joints; apparent stagnation in inflammation therapy; constant and developing aspects of oncology; novelties vs. traditional methods in reconstructive surgery; postsurgical maxillofacial prosthetics; importance and new possibilities of postoperative observation; failures necessary to share to avoid their occurrence.

Guest Editor

Dr. Igor Tsesis

ASUR Marche, AV5, Hospital of San Benedetto del Tronto, 63074 San Benedetto del Tronto, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
