

# Special Issue

## Hysteroscopy

### Message from the Guest Editor

Operative office hysteroscopy is an essential part of gynecologic practice. Hysteroscopy is a relatively safe procedure. However, as with any type of surgery, complications are possible. With hysteroscopy, complications occur in less than 1% of cases. Interest in the field of hysteroscopy is continuously increasing. We believe that there is a need for an update in hysteroscopy, safer and improve the effectiveness of hysteroscopy in the diagnosis and treatment of intrauterine pathologies. This Special Issue focuses on recent advances in hysteroscopy.

### Guest Editor

Dr. Ferdinando Antonio Gulino

Obstetrics and Gynecology Unit, Department of General Surgery and Medical Surgical Specialties, University of Catania, 95124 Catania, CT, Italy

### Deadline for manuscript submissions

closed (20 June 2023)
