

Special Issue

Cardiothoracic Surgery, 2nd Edition

Message from the Guest Editors

Cardiothoracic procedures are often lifesaving operations. There are effective treatments, including transplantation, for almost all cardiac and thoracic diseases that can be performed with a low risk of morbidity and mortality. Cardiac surgeons are commonly challenged with weighing the potential risks and benefits of a surgical procedure. It is our privilege to invite experts in the field to share their expertise and submit new ideas and cutting-edge research to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Surgery, as in the ‘stitching of wounds with bone needles’, is the oldest form of medicine after herbs, dating from 30,000 BC. While basic principles remain, technology has progressed enormously, especially in recent years. *Surgeries* provides a platform for all surgery-related developments, both clinical and scientific, while its open access format ensures global availability. A wide variety of subjects will be covered by our enthusiastic, international, and interdisciplinary Editorial Board and team. Besides ensuring rapid, high-quality review, editors will actively organize Special Issues on topics of high interest. Together with authors and reviewers, we aim to develop *Surgeries* into an indispensable, easily accessible source for surgery professionals and beyond.

Editor-in-Chief

Prof. Dr. Salomone Di Saverio
ASUR Marche, AV5, Hospital of San Benedetto del Tronto, 63074 San Benedetto del Tronto, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
