## Surgical Resection

### Message from the Guest Editor

We welcome papers dealing with all aspects of resection. In particular, surgical resection of a tumor can be performed for many types of cancer. We invite you to co-create, with the aim of presenting the best proven practices, innovative clinical management, and prospects for the development of surgical resection. Submitted manuscripts will formally undergo a rigorous peer-review process. All articles published by MDPI are made immediately available worldwide under an open access license.

## About the Journal

### Message from the Editor-in-Chief

Surgery, as in the ‘stitching of wounds with bone needles’, is the oldest form of medicine after herbs, dating from 30,000 BC. While basic principles remain, technology has progressed enormously, especially in recent years. *Surgeries* provides a platform for all surgery-related developments, both clinical and scientific, while its open access format ensures global availability. A wide variety of subjects will be covered by our enthusiastic, international, and interdisciplinary Editorial Board and team. Besides ensuring rapid, high-quality review, editors will actively organize Special Issues on topics of high interest. Together with authors and reviewers, we aim to develop *Surgeries* into an indispensable, easily accessible source for surgery professionals and beyond.
