Message from the Guest Editor

As the world emerges from the COVID-19 pandemic, there is growing concern about future sustainability across society. With the tourism industry expected to breach and surpass pre-COVID-19 activity levels, there are growing calls for tourism degrowth to ensure sustainability. The past decade has highlighted the vulnerabilities of tourism to multiple threats, ranging from pandemics to global geopolitical turmoil, energy insecurity, and climate-change-induced extreme weather events, among others. Given the dual nexus between tourism and climate change, there have been growing calls for the tourism, hospitality, conferencing, and transport and aviation tourism industries to participate in the transition to actively ensure sustainability in tourism. Tourism climate change mitigation, adaptation, and resilience are central to ensuring that the sector continues to contribute to the 17 Sustainable Development Goals (SDGs). Post the pandemic, ethical business practices constitute a moral imperative and make business sense. This Special Issue explores the nexus between climate change and sustainability post the COVID-19 pandemic era.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
