Deadline for manuscript
submissions:

closed (15 September 2025)

Message from the Guest Editor

Building a healthy future is inevitable for the health and well-being of current and future generations. Sustainable living environments that enhance public health are a foundation to maintain and improve health and well-being and play a role in the development of economic growth. We are excited to announce a call for submissions to a Special Issue focusing on accountability, sustainability, environmental and public health, and equity. This Special Issue explores innovative research, policy perspectives, and practical implementations that contribute to building a healthy future for current and future generations. We invite manuscripts that examine a wide range of topics including, but not limited to (1) sustainable urban/rural development and planning; (2) social determinants of health and equity; (3) healthy indoor home environments; (4) environmental and occupational health; and (5) energy poverty/equity. Energy poverty, a condition where households cannot afford basic energy services, can lead to inadequate heating or cooling, impacting health through increased vulnerability to extreme temperatures, respiratory conditions, and stress-related illnesses.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
