Deadline for manuscript
submissions:
closed (6 October 2024)

Message from the Guest Editor

Resources include nonrenewable minerals and fossil fuels and renewable biogases and biofuels, as well as water and nutrients. Having a secure supply of resources plays a significant role in satisfying growing life standards and industrial applications. The recovery of resources in a more sustainable approach is crucial in exploiting and conserving natural resources, preventing secondary pollution, protecting the environment, and accomplishing a carbon-neutral economy.

The aim of this Special Issue is to provide a platform for the publication of applied or fundamental research on greener and more sustainable materials and technologies and more eco-friendly engineering solutions for resources recovery.

School of Environment and
Natural Resources, Ohio State
University, Columbus, OH 43210,
USA

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
