Message from the Guest Editors

Dear Colleagues,

Digital transformation (DT) is no longer an emerging trend; it has become integrated into national and corporate strategic agendas. It is considered a viable mechanism to realize the needed transformations in today's hyper-competitive environment. Within this context, DT could become a vehicle to achieve all 17 sustainable development goals (SDGs).

In this Special Issue, experimental, case-based, qualitative, quantitative, survey, and review articles are invited to include areas of DT (but is not limited to) such as evolution and theory, ethics, organizational design, change management, implementation methodologies, service model, benefits and risks within the lens of sustainability, enablers and barriers, legal frameworks, and architectures. Further, the articles dealing with the adoption of DT in healthcare, education, smart cities, industry 4.0, government services, agriculture, and to support SDGs are also solicited.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
