Message from the Guest Editors

We are, as we know, living in a rapidly aging world. Life expectancy has increased remarkably in a short time, and the process is ongoing—most particularly in developing countries. Simultaneously, birth rates are falling in most areas of the world.

While the increase in longevity is to be celebrated, the demographic shifts we see naturally raise challenges. And these changes are occurring in a particular context—climate change, increased awareness of pandemic risk, increased geopolitical and economic instability.

The UN has issued a collection of Sustainable Development Goals (SDGs) which seek to address many of the issues faced by society today. A worthy initiative, and one which is noteworthy in part by the relative sparseness of reference to older people.

The aim of the current Special Issue is to examine how the SDGs might relate to the roles and the wellbeing of older people specifically. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) health, wellbeing, the environment, social roles, work roles and retirement.

Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
