**Dr. Wan-Yang Gao**

Deadline for manuscript  
submissions:

**closed (15 April 2023)**

### Message from the Guest Editors

Dear Colleagues,

Construction and related industries are responsible for today's warming and the depletion of non-renewable energy/resources. How to achieve sustainable development in the construction industry and extend the service life of the existing structures is a serious topic. The aim of this issue is to investigate the relationship between the environment/resources and construction activities/structural maintenance within the context of sustainable development. It considers the theoretical and methodological basis of approaches designed to quantify the impacts associated with choices made at different stages of the building life cycle, as well as tools designed to evaluate relative environmental and sustainability performance.

The scope of this Special Issue includes:

- Indicator systems and indicators for sustainability;
- Sustainable construction materials;
- Technology and tools in sustainable construction;
- Application of AI in building life cycle assessment and service life evaluation;
- Energy efficiency during maintenance;
- Structural retrofitting based on novel materials and technologies;

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
