Deadline for manuscript submissions:

31 August 2023

Message from the Guest Editor

Three-dimensional (3D) printing utilizing low-cost FFF material extrusion technology has become a topic of elevated interest in recent years from both academic and industrial points of view, with increasing importance within the digital manufacturing context. At present, many materials are used in the FFF material extrusion 3D printing, and their range is expanding rapidly. Recently, plastics, metals, ceramics, composites, and biological, nano, and green materials have been increasingly used.

Smart 3D printing can optimize 3D printing parameters to improve the 3D printed parts' sustainability in terms of cost, time, quality, and energy, and can help to eliminate carbon emissions to the environment.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and other databases.

Journal Rank: [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
