Deadline for manuscript submissions:

**15 November 2023**

### Message from the Guest Editors

Social vulnerabilities are a central theme that can be inferred from the 17 Sustainable Development Goals - SDGs - by the United Nations (United Nations Development Program. (2015)). Environmental and human sustainability, well-being, and equality of access to resources are among the aspects taken into account more extensively in the goals, which aim at significantly improving the living conditions of the world population, demonstrating how sustainable development cannot be achieved without a significant transformation of the way we build and manage our urban and rural spaces, our environment, our sense of community, our health.

Understanding and resolving such a complex problem requires an interdisciplinary dialogue. This call for papers is therefore urging for a comparison between different areas of study such as those on vulnerabilities, peripheries, segregation, communities and the related research methods, in order to contribute to answering the requests from international organizations to rethink the practices of building a sense of community and reduction of social vulnerabilities and to make room for sustainability as a founding value for present and future societies.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
