Message from the Guest Editor

The Built Environment is pivotal in addressing future challenges raised by climate change. It is responsible for a significant share of GHG emissions but provides an ecosystem of assets and services essential to modern life.

Academics, practitioners, and policy-makers struggle to find the technical, economic, and social solutions and processes to increase the sustainability of the built environment. These solutions and processes often involve a multidisciplinary approach, bringing together industry, research centres, and decision-makers to design, implement, and roll out successful initiatives.

This Special Issue intends to provide a set of contributions with practical implications for improving the sustainability of the built environment. Unlike previous collections, this Special Issue will focus on the design, demonstration, and/or implementation of practical contributions for the built environment subsystems: buildings, roads, water supply, energy, waste management, etc.

an Open Access Journal by MDPI

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
