submissions:

**closed (10 December 2023)**

### Message from the Guest Editors

Dear Colleagues,

The development of society simultaneously produces a great deal of solid waste. As a result, there is an urgent need to utilize resources. There are various kinds of solid waste, such as industrial solid waste, agricultural solid waste, mining solid waste, etc. Modified solid waste can be used in aggregates and mineral admixtures to apply in cement-based materials, reducing the production cost of cement-based materials and alleviating the environmental pollution caused by solid waste.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- All kinds of solid waste modification;
- Utilization of solid waste in cement-based materials;
- Effect of solid waste on properties of cement-based materials;
- Environmental effect of cement-based materials with solid waste;
- We look forward to receiving your contributions.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
