### Message from the Guest Editor

Dear Colleagues,

The main purpose of this Special Issue will be to enhance our knowledge of sustainability and ways of enhancing synergies between the two important objectives of sustainability. Further, the Special Issue will support informed policy making by providing empirical evidence on the possibility of synergies and/or trade-offs between environmental conservation and economic development.

This Special Issue covers theoretical, empirical, and review articles, and the potential topics include (but are not limited to):

- The role of protected areas in promoting sustainability;
- The effectiveness of different pollution control instruments and their impact on economic welfare;
- The role of the COVID-19 pandemic on environmental conservation and economic development goals;
- Policy options to promote synergies between conservation and economic development (at different scales);
- Progress toward sustainability: is the world becoming more sustainable?
