Message from the Guest Editors

The aim of this special issue: to establish a bridge between theory and practice in the built environment by examining in-depth the consequences for citizens.

Any of the latest research findings and innovative approaches will help to redefine contemporary built environments in relation to the different perspectives. A broad outline of the special issue's scope includes peer-reviewed original research articles, case and technical reports, reviews and analyses. All scholars, practitioners, and policymakers with a common interest to study architecture and urban design from different perspectives are invited to contribute for that. An interaction with different intertwined fields including economy, architecture, engineering, sociology, anthropology, cultural studies, and digital studies, is expected.
