closed (15 November 2023)

Message from the Guest Editors

The changes brought about by globalization and new technologies have important implications for occupational safety and health (OSH).

These challenges include: (1) numerous industrialized countries are facing the challenges of an ageing population and workforce; (2) recruiting appropriately qualified and experienced OH professionals; (3) changes in national healthcare systems due to public health challenges such as the increasing prevalence of non-communicable diseases and ageing populations; and (4) encouraging people to remain in the workforce for an extended period, which requires an emphasis on aligning work tasks with an individual's changing capabilities throughout their life span.

Given the above, the main objective of this Special Issue is to raise awareness, conduct research and education, disseminate best practices, and influence policy-making in the field of work organization and psychosocial factors. Another aim is to explore innovative techniques and approaches for enhancing the effectiveness of OSH management by integrating public health principles with business management practices.

- work organisation
- psychosocial factors
- ageing
- healthy workplace

an Open Access Journal by MDPI

Editor-in-Chief

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
