Message from the Guest Editors

Meeting carbon neutrality goals through technological innovations and renewable energy sources is the main focus of this Research Topic. It will add to existing knowledge by putting forward valuable information for emerging and developing economies relating to carbon neutrality targets. Energy consumption is believed to be a significant contributor to environmental degradation. Hence, new forms of energy sources should be empirically checked if these can be used as an alternative, and this Research Topic aims to provide such analysis.

The topics to be covered in this Topic include carbon neutrality, technological innovations, renewable energy, sustainable economic development, and green energy. The Topic is an avenue towards discussion and empirical research on areas that can help economies to reach carbon neutrality goals through improved technology and environment-friendly energy sources.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Technological innovations;
- Sustainable energy;
- Environmental planning;
- Sustainable economic development;
- Green energy.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
