Message from the Guest Editors

Dear Colleagues,

The "perfect storm" of climate change has significant impacts on many aspects of life and nature. Climate changes are long-lasting differences and changes in the temperature and weather, which represent a significant risk in today's society. Changes in the climate are a prelude to the occurrence of many disasters and extreme changes in the atmosphere. Disasters can be natural or human-made; nevertheless, they are catastrophic events with atmospheric, geological, and hydrological origins that can cause fatalities, property damage, and social and environmental disruption. Improved disaster risk management and resilience are essential for sustainable societies. However, the science of natural hazards is too fragmented to influence policy effectively.

This Special Issue seeks to cover the impact of climate change and natural disasters on society and food production, including natural processes, such as floods, heat waves, earthquakes, or landslides, and also to consider their impacts on natural and human dimensions, including societal and economic processes, such as economic vulnerability and socially sustainable development.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
