Message from the Guest Editors

Dear Colleagues,

The 21st century has made it clear that global cities are increasingly subject to pressures of various kinds, the effects of which impact the socio-ecological sphere in increasingly dramatic ways. Therefore, disciplines, such as urban planning, green urban design, architecture, agricultural and agronomic sciences, as well as medicine, among others, are increasingly being called upon to coordinate closely across disciplines to propose future solutions for cities that go beyond mere mitigation and adaptation.

This call aims to investigate how the combined contribution of these disciplines can produce resilient 'bounce-forward' solutions to future-proof the world's cities in 2050. In urban areas, green design is often in conflict with commercial demand and social needs. From this perspective, the sustainable use of ecosystem services is a key factor for the future of our urban areas.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
