Message from the Guest Editors

Dear Colleagues,

Smart cities are being promoted in many countries to solve existing urban issues, enhance the sustainability of cities, and improve the quality of citizens' lifestyles by using innovative technologies. These days, mobility services are evolving from the existing transportation system, which includes shared vehicles, shared micromobility, demand responsive transit, and automated vehicles. In order to introduce and operate these new mobility services, innovative strategies and detailed technologies are required, particularly with the aid of data science and artificial intelligence.

This Special Issue aims to provide selected contributions on advances in active traveling and transportation planning in the field of smart cities, by showcasing innovative ideas for introducing and operating various mobility services. Potential topics include (but are not limited to):

- Planning or operating shared micromobility services;
- Planning or operating demand responsive transit (DRT) services;
- Automated vehicle operations in mixed traffic;
- Mobility as a Service (MaaS) operation;
- Planning or operating urban air mobility (UAM) services;
- Pedestrian safety.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
