Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Sustainability* explores the current state and momentum of sustainability education in colleges and universities globally. In response to the state of the world and in recognition that sustainability is fundamentally about social change, we explore promising research, practices, and theory currently shaping the field of sustainability education as an important driver of social change.

We seek articles on innovative approaches and developments in higher education as well as fresh perspectives on continuing challenges. We encourage theoretical, methodological, and empirical research works on teaching and learning, competencies and assessment, policy, program development and implementation, instructor preparation, community- and project-based learning, institutional collaborations and partnerships, and other relevant subjects. Questions may be directed to the guest editor.
