Message from the Guest Editors

Dear Colleagues:

The concept of power take-off (PTO) in the topic of wave energy conversion (WEC) is considered as the group of elements in charge of transforming the mechanical energy captured from the waves into electricity delivered into the electric grid

The topics included in this special issue will be: development of PTO technology; demonstration of new PTO performance; improvement of PTO control strategies; onshore testing previous to final commissioning; optimization of PTO design; PTO standardization; scalability and modularity of PTOs; validation of wave-to-wire models; demonstration of grid-compliance power, including short-term energy storage solutions to smooth power output

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
