### Message from the Guest Editors

Dear Colleagues,

This Special Issue will be composed of a selection of papers addressing a wide range of approaches and tools with the objective of facilitating and improving sustainability in affordable housing.

Connecting sustainability and affordability in housing is challenging. Affordable housing is traditionally assessed by economic values, namely linking housing costs to income. However, the importance of affordability in housing exceeds individual households and it has considerable impacts on wider scales such as in the economy, health and sustainability, as well as in specifically addressing the energy poverty problem.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
