Message from the Guest Editors

A primary focus of researchers during the ongoing coronavirus pandemic is on how COVID-19 will affect agricultural production and consequently global food security. Agricultural activities comprise dairy, poultry, fisheries, and crop production. All these components of the agricultural industry are areas of interest for various researchers across the globe. Depending upon the nature and specialty of agriculture (e.g., dairy versus poultry versus plant production), different countries will see varying impacts of COVID-19 on their respective economies.

Focus: This Issue focuses on the post-pandemic situations of agricultural production worldwide.

Scope: The Issue's scope is to publish studies on the impact of COVID-19 measures including lockdown, social distancing, closure of localities (municipalities, cities, countries, contents), and other precautionary approaches against virus spread on the production of dairy, poultry, fish, and plant products.

Purpose: The purpose of this Issue is to provide opportunities to researchers worldwide to contribute to the knowledge base of post-COVID-19 Agriculture and Food Security.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
