We welcome contributions which problematize the un-critical and un-political assumptions of current urban policy frameworks (i.e. New Urban Agenda, UN SDG, among others). We note that the modern origins of urban planning in Europe and the US – radical transformations in their time – were brought about by responses to epidemics and pandemics such as malaria and cholera. Then as now, they resulted from intense cooperation of the public health, urban planning and related professions, aligning their goals and perspectives.
