Message from the Guest Editor

Dear Colleagues,

The East Asian monsoon (EAM), as the major feature of the East Asia atmospheric circulation, is one of the most active components of the global climate system. It has large variabilities at different timescales, and often leads to severe natural hazards such as flooding, drought, heat waves, and blizzards, and exerts great impacts on society and human lives throughout East Asia. Thus, it is of great interest and importance to study, simulate, and predict the variability of the EAM.

This Special Issue invites papers on all aspects of the EAM, from the variability and predictability of the EAM to extremes and projections. The submission of original and review articles that aim to study EAM variability, the role of different teleconnections, extremes, predictability on multiple timescales, and projections of future changes in the EAM are particularly welcome.

Keywords:

East Asia monsoon variability and change
atmospheric teleconnections
droughts and floods
projections
East Asia monsoon dynamics
extreme weather and climate events

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and many [other databases](#).

Journal Rank: [JCR](#) - Q2 (*Environmental Sciences*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
