Message from the Guest Editors

This Special Issue brings together reliable analyses and model approaches including but not limited to the Covid-19 lock down impact on the atmosphere and may lead to new research opportunities towards a sustainable air transport system. It seeks papers encompassing all aspects of aviation-meteorology cause-effect models. Contributions on the impact of air traffic on climate change and on the strategic development of a sustainable air transport sector are also welcome.

The aim is to foster further the scientific knowledge on globally sustainable solutions for the air transport system while coping with the IPCC 2° target.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
