Message from the Guest Editors

Dear Colleagues,

Mountain ungulates have great value from both the scientific and the conservation standpoint. The past few decades have seen a variety of different trends in wild mountain ungulate populations in different areas, some recovering from near-extinction, some declining, some showing a stable or increasing trend, and some potentially causing conflicts with human-driven ecosystems.

In this Special Issue, we aim to provide a state-of-the-art overview of the biology, ecology, and management of mountain ungulates of the world.

For further reading, please visit the [Special Issue website](#).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
