Message from the Guest Editors

This special issue will focus on biorefining of organic (solid) waste, as viewed through the prism of circular economy, and will cover the following state of the art topics:

- Organic waste source separation schemes: decentralized vs centralized schemes.
- Characterization of municipal and industrial biowaste.
- Valorization of organic waste and recovery of useful compounds/materials.
- Home and community composting.
- Waste-based bioethanol generation.
- Hydrogen production via anaerobic digestion.
- Biogas refining and upgrading.
- Life cycle analysis of biorefining techniques in organic waste management.
- State of the art in MBT technologies for municipal solid waste management.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
