# Impact-driven Broadband Piezoelectric Energy Harvesting: Design and Applications

Guest Editors:

#### Prof. Dr. Wei-Jiun Su

Department of Mechanical Engineering, National Taiwan University, Taipei 10617, Taiwan

#### Prof. Dr. Yum Ji Chan

Department of Mechanical Engineering, National Chung Hsing University, Taichung City, Taiwan

Deadline for manuscript submissions: closed (31 January 2022)

#### Message from the Guest Editors

The use of energy harvesting as a power source can dramatically reduce the construction and maintenance costs and enable self-powered electronic devices that operate under vibrations and impacts. The property of up-conversion makes impact-based frequency piezoelectric energy harvesting suitable for low-frequency broadband applications over vibration-based and piezoelectric energy harvesting. There is much demand for high-efficiency impact-driven piezoelectric energy harvesters for versatile applications. In this Special Issue, we aim to showcase the state-of-the-art of impact-driven energy harvesting. Potential topics include, but are not limited to:

innovative designs for broadband impact-driven energy harvesting; modeling of and experiments on impact-driven energy harvesting; conditioning circuits for impact-driven energy harvesting; energy storage systems for impactdriven energy harvesting; optimization of impact-driven energy harvesters; efficiency studies of impact-driven energy harvesting; enhancement of the durability of impact-driven energy harvesters; and application-oriented studies on impact-driven energy harvesting.

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
