Message from the Guest Editors

Dear Colleagues,

Buildings play a significant role in the achievement of a decarbonized and sustainable society. Over the years, tremendous efforts have been made in sustainable building design, with the key objectives of minimizing resource consumption and creating a healthy and productive built environment for the occupants. Meanwhile, keeping the sustainable operation of buildings is also important, with requirements that include performance monitoring and tracking, preventative maintenance, and fault detection and diagnosis.

This Special Issue aims to create a platform for researchers and practitioners to share the advanced developments, current good practices, and lessons learned in the pursuit of sustainable building design and operation. Studies related to the interaction and integration between building design and operation for sustainable development are especially welcome.

Dr. Weimin Wang

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: [JCR - Q2 \(Environmental Sciences\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
