Deadline for manuscript submissions:

closed (31 May 2022)

Message from the Guest Editors

Climate change, urbanization phenomena, and numerous other environmental and social issues form serious challenges to preserving a healthy future on a global scale. Moreover, the ongoing pandemic of COVID-19, which has exceeded 29 million infections world-wide and about 900,000 deaths, is a strong reminder that urbanization has changed the way that people and communities live, work, and interact, and it is necessary to make the systems and local capacities resilient to prevent the spread of infectious diseases. How we can redesign the concept of public health in relation to the built environment and the contemporary cities?

This Special Issue aims to bridge the knowledge from public health experts to designers, or from policy-makers to local health agencies, and vice-versa, addressing the capabilities of the built environment to promote and protect health and well-being, and to boost actions and policies aimed to transform our cities into healthier and “salutogenic” living environments.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
