Message from the Guest Editors

This Special Issue focuses on the following research areas that can contribute to sustainable business development in society:

Derivatives: Derivatives perform a significant role in financial activity by enabling businesses and investors to manage their financial risks for which they are exposed, and to more effectively associate their experiences with risk tolerance and risk management requirements.

Supply chain: Sustainability is becoming a significant priority for business enterprises.

Financial innovation: Fintech has evolved and disrupted almost all aspects of financial services, including payments, investments, consumer finance, insurance, securities settlement, and cryptocurrencies.

Accounting frameworks: Sustainability accounting connects companies' strategies from a sustainability framework by disclosing environmental, economic, and social information.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
