### **Message from the Guest Editor**

Economic and financial upheaval faced by businesses, individuals, and governments worldwide in the aftermath of COVID-19 highlights the need for the development of sustainable business practices. The purpose of this Special Issue is to publish high-quality research which expands the existing literature on various aspects of economic, financial, and health-sector-related sustainability.

The topics covered in the Special Issue may include but are not limited to:

- Sustainable financial practices (green finance, corporate debt, free-floating shares, liquidity) under external shocks (i.e., COVID-19, other types of crises, or general uncertainty);
- Sustainable economic development strategies (i.e., unemployment, export performance, domestic demand for goods and services including healthcare) under external shocks (i.e., COVID-19, other types of crises, or general uncertainty);
- Sustainable entrepreneurship (i.e., general entrepreneurship, firm sales/revenue, profitability, productivity, and survival) in the presence of external shocks (i.e., COVID-19, other types of crises, or general uncertainty).

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
