Message from the Guest Editors

Dear Colleagues,

In the last 20 years, numerous scholars deepened the theme about the importance of a sustainable value creation by companies as a source of global competitive advantage. The latest crisis due to Covid-19 accelerates the debate about the non-sustainability of the current business approach pressing for new sustainable business models. SMEs have limited resources and face various barriers, furthermore they take shape as an heterogeneous universe requiring business models to drive the transition to sustainability consistent with their dimensions and industry of belonging. Hence, for this Special Issue we invite papers that address the SMEs' challenges for positioning in a sustainable path of development by means of the change of their business models.

Topics may include, but are not limited to:

- Sustainability Business Models
- Circular Economy
- Sustainability Performance Assessment
- Sustainability and Innovation
- Barriers towards sustainability strategies in SMEs
