### Message from the Guest Editors

Dear Colleagues,

The past 20 years have witnessed a rise in academic interest across the social sciences in exploring the transition dynamics required for societal systems to shift toward greater degrees of sustainability. This body of work is broadly labelled as the sustainability transitions literature (Köhler et al., 2019; Markard et al., 2012; van den Bergh et al., 2011). This is not a uniform body of knowledge, however, nor is it represented by a distinct theoretical framework. The field encompasses a variety of theoretical frameworks spanning the social sciences including but not limited to political science, sociology, sustainability science, psychology, and management (Kemp et al. 1998; Schot and Geels, 2008; Markard et al., 2012; Lozano, 2013).
