Message from the Guest Editors

The existing COVID-19 situation has changed the world, the basic meaning of sustainability, and sustainable development work. This immense challenge must be seen as an opportunity for all scientists in all disciplines and areas of research to work together to respond to the challenge caused by human intervention into natural ecosystems. In this new Special Issue, the aim is to address three dimensions of sustainability in an interdisciplinary and transdisciplinary manner. The adopted perspective is that of Circular Economy (CE).

COVID-19 has radically changed the economy of the world, e.g., as of today, an approximate 25% rate of unemployment is projected in the US. COVID-19 has fundamentally transformed the social dimension of sustainability or the discussion concerning it, e.g., a massive hunger crisis in Africa is predicted as we are writing this particular call for papers (April 22, 2020). Additionally, of course, when considering the environmental dimension, radical emission reductions in many places around the world due to economic shutdown are a paradoxical fact.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
