### Message from the Guest Editors

Dear Colleagues,

Using the scarce resources of the planet efficiently is critical to providing humanity with a prosperous future. Circular economy has a key role to play in achieving this objective. That is why, at present, circular economy is one of the most popular topics in global research.

So far, researchers have focused their attention on the productive industry and other polluting sectors, leaving aside other relevant sectors such as tourism or other service industries in general.

In this sense, this Special Issue aims to cover this gap in the research.

Qualitative, quantitative studies, analyses of current regulations, bibliographic reviews, case studies or examples of good practices will be welcome in this Special Issue.
