submissions:

**31 August 2020**

### Message from the Guest Editors

Sustainability is increasingly being understood as the central challenge of our time. This is especially true with regard to climate change. Natural scientific and technical knowledge of problem relationships in dealing with nature, resources, and climate is important. The ecological challenges are too great not to aim for a behavioral change, given the—legally binding—1.5 degrees limit in Article 2 of the Paris Agreement that may require global zero emissions in 20–30 years. This is the starting of this Special Issue on climate change and human reaction. We want to investigate, the conditions for individual and social change, the means or governance instruments for zero fossil fuels in all sectors and drastically reduced livestock emissions in 2040 or 2050. Transdisciplinary approaches should play a special role. It is important to the guest editors that the Special Issue stands for pluralism and expressly gives room to uncomfortable, unexpected, and heterodox views and methods. We invite qualitative as well as quantitative studies that adhere to high quality standards and provide plausible justifications of their methodological choices and study design.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2019).
