Sciences, Pakistan

### Message from the Guest Editors

This Special Issue will report on state-of-the-art techniques and their global applications for the assessment of impacts and adaptation to climate change on hydrology and water resources. Reporting possible changes in hydrological hazards at local, regional, and global scales under different climate change scenarios, particularly SSP scenarios and the adaptation measures that should be taken to mitigate the impacts under new scenarios will be the major focus of this issue. Although there have been plenty of articles on this theme for the past several decades, the subjects related to climate change impacts and adaptation to hydrology should be continuously studied due to their importance. It is also important to reanalyze the existing data and update the previous findings based on recent scenarios.

Deadline for manuscript  
submissions:

**closed (30 May 2021)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
